Dr. Lewis H. Weed, National Research Council - phone

Asked whether I wanted to see him and George Corner regarding the programs of the NRC Committee on Sex Phenomena. I said that I thought the matter could be handled perfectly satisfactorily by mail. I added that the question of a grant to Kinsey involved the rather unusual circumstances of a grantee receiving royalty income from a publication which was larger than the grant which had made the publication possible. I was inclined to think that our Board would not feel that further aid was needed but that I had not talked with Kinsey about this as I had planned to do this afternoon.
