Dear Doctor Kinsey:

Thank you for your letter of May 23. I am inclined to think you have made the best choice and certainly the appearance of the book exclusively as a medical publication very greatly protects it and you from the charge of sensationalism, etc.

Our counsel has examined the copy of the articles of incorporation and offers no suggestions from the Foundation point of view as to changes in wording.

Since the docket deadline for the last meeting of the spring has closed there will be no chance of any item coming up before late September or October. I say this to head off any assumption that action could be taken with great promptness this summer.

Yours sincerely,

Dr. Alfred C. Kinsey
Professor of Zoology
Indiana University
Bloomington, Ind.
