My dear Dr. Gregg:

We are, of course, very much pleased and very grateful to you personally and to the Foundation and its trustees for the appropriation of a three year fund for our Research on Human Sex Behavior. We deeply appreciate the personal interest that you have taken in this work and the intelligent understanding you have had of the problems which we have faced.

I think our productiveness in the next three years will please the trustees. I am glad that your trustees now know as much about the Research as you have described to them.

If at any time you have suggestions or if at any time we can serve you or the Foundation on some specific point, we should consider it a privilege to work with you.

Alfred C. Kinsey
Professor of Zoology
