97

November 2, 1910.

Dear Mr. Rockefeller:

I am enclosing herewith two extracts on Hook worm Disease which need no comment. It is amazing how this subject grows on our hands. It looks as though we had hit on one of the great world miseries and that this movement is destined to be world wide before we get through with it. I shall undertake to see that all the missionary organizations become acquainted with this fact so that through the missionary medical schools the question can be taken up locally in the affected countries.

Very truly yours,

F. T. GATES.

Mr. John D. Rockefeller.
